Job Description:

The Data Governance, Quality and Observability Subject Matter Expert/Leader will act as an organizational expert and consultant in developing and implementing comprehensive frameworks and policies to optimize data accuracy, reliability, and observability.

This role involves collaborating with diverse teams to integrate data strategies, ensuring compliance with relevant regulations and policies, and staying informed of industry advancements to recommend best practices. The specialist is expected to have extensive experience in data governance, strong analytical and communication skills, and proficiency in technical skills like SQL and Python.

Responsibilities:

- Serve as a subject matter expert and consultant in data governance, data quality, and data observability, leveraging tools and frameworks such as Collibra, Informatica, Alation, Apache Griffin, Ataccama, Monte Carlo, BigEye, and Acceldata.
- Develop and implement robust data governance, quality, and observability frameworks, policies, and procedures, utilizing methodologies like DAMA-DMBOK, Six Sigma, and COBIT, to ensure high data accuracy, reliability, and observability across the organization.
- Collaborate with various teams, including Data Architecture, ML/AI Development, and Business Users, to integrate data governance, quality, and observability strategies and ensure compliance with data regulations and policies.
- Conduct assessments and audits of data management and observability practices to identify areas of improvement
- and ensure adherence to industry standards and best practices.
- Develop training materials and conduct workshops to enhance organizational understanding and adoption of data governance, quality, and observability principles.
- Stay abreast of industry trends and advancements in data governance, quality, and observability to recommend and implement best practices.

Minimum Qualifications:

- Master's/bachelor's degree in computer information systems, Computer Science, or a related field.
- Minimum 8 years of relevant experience in data governance, data quality, and data observability, with proficiency in tools like Collibra, Informatica, Talend, Ataccama, Monte Carlo and BigEye,
- Strong understanding of data governance principles and practices, including data cataloging, data regulation, and policy enforcement, with knowledge of frameworks like DAMA-DMBOK and COBIT.
- Excellent analytical, problem-solving, and organizational skills.
- Strong communication and interpersonal skills, with the ability to convey complex technical concepts to nontechnical stakeholders.
- Technical proficiency in SQL and Python.

Preferred Qualifications:

- Certifications in data governance or related fields, such as Certified Information Management Professional (CIMP) or Certified Data Management Professional (CDMP).
- Experience in consulting and delivery management, with the ability to lead and inspire high-performing teams.
- Exceptional leadership and stakeholder management skills, with the ability to build relationships with senior stakeholders.
- Experience in conducting training and workshops on data governance, quality, and observability topics.
- Knowledge of industry standards and best practices in data governance, quality, and observability.

Soft Skills:

- Organizational Skills
- Adaptability
- Teamwork
- Self-Motivation

Behavioral Skills:

Take ownership and accountability of outcomes, ensuring successful project delivery and client satisfaction.

Exhibit excellent written and verbal communication skills, effectively conveying complex information.

Demonstrate strong problem-solving abilities, addressing challenges with innovative solutions.

Foster a collaborative team environment and show self-driven initiative to achieve goals.
