

Position: Senior Java Backend Developer

Bengaluru, Karnataka, India

Factspan Overview:

Factspan is a pure play data and analytics services organization. We partner with fortune 500 enterprises to build an analytics center of excellence, generating insights and solutions from raw data to solve business challenges, make strategic recommendations and implement new processes that help them succeed. With offices in Seattle, Washington and Bengaluru, India; we use a global delivery model to service our customers. Our customers include industry leaders from Retail, Financial Services, Hospitality, and technology sectors.

Key Responsibilities:

- Develop and maintain backend microservices using Java and Spring Boot
- Build and integrate APIs (both GraphQL and REST) for scalable service communication
- Deploy and manage services on Google Cloud Platform (GKE)
- Work with Google Cloud Spanner (Postgres dialect) and pub/sub tools like Confluent Kafka (or similar)
- Automate CI/CD pipelines using GitHub Actions and Argo CD

Required Qualifications

- 7+ years of backend development experience with Java and Spring Boot
- 4+ years working with APIs (GraphQL and REST) in microservices architectures
- 4+ years of hands-on experience with GCP, AWS, or Azure
- 2+ years working with pub/sub tools like Kafka or similar
- 2+ years' experience with databases (Postgres or similar)
- 3+ years' experience with CI/CD tools (GitHub Actions, Jenkins, Argo CD, or similar)

Preferred Qualifications

- Bachelor's degree in computer science, Information Systems, or related field.
- Hands-on experience with Google Cloud Platform
- Familiarity with Kubernetes concepts; experience deploying services on GKE is a plus
- Strong understanding of microservice best practices and distributed systems
