

Position: **Data Engineer- Cloud Data & Snowflake Integration**

📍 Bengaluru, Karnataka- India

Factspan Overview:

Factspan is a pure play data and analytics services organization. We partner with fortune 500 enterprises to build an analytics center of excellence, generating insights and solutions from raw data to solve business challenges, make strategic recommendations and implement new processes that help them succeed. With offices in Seattle, Washington and Bengaluru, India; we use a global delivery model to service our customers. Our customers include industry leaders from Retail, Financial Services, Hospitality, and technology sectors.

Role Overview:

We are seeking an experienced Data Consultant to design and implement scalable data pipelines for healthcare data processing. The role involves extracting patient data from Datawarehouse, transforming it using modern cloud-based tools, and reintegrating it into the Datawarehouse for secure sharing. The consultant will play a key role in ensuring data quality, governance, and compliance while enabling efficient, automated data workflows. This is a hands-on role, requiring active involvement in data engineering activities, including pipeline development, data transformation, and system integration.

Responsibilities

- Design and implement end-to-end data pipelines to extract, transform, and load (ETL/ELT) patient data within Snowflake environments
- Perform hands-on data engineering tasks, including coding, data transformation, debugging, and optimization of pipelines
- Develop scalable data integration solutions to enable seamless data exchange with third-party vendors (replacing flat file-based processes)
- Architect and optimize cloud-based data platforms using AWS and/or GCP
- Ensure data quality, integrity, and governance across all stages of the data lifecycle
- Implement automation frameworks and CI/CD pipelines for data workflows
- Collaborate with stakeholders across North & South Hospitals to understand data requirements and ensure compliance with healthcare standards
- Monitor and troubleshoot data pipelines, ensuring performance optimization and reliability
- Provide technical leadership and best practices in data architecture and strategic data management
- Document data flows, transformations, and system architecture

Core Competencies:

- Data Architecture and Data Modeling
- Cloud Data Solutions (AWS, GCP, Snowflake, Informatica IDMC/IICS)
- **Hands-on Data Engineering and Pipeline Development**
- Data Quality and Governance
- Strategic Data Management
- Automation and CI/CD
- Delivery Excellence and Thought Leadership

Required Skills & Technologies:

- Strong experience with Snowflake (data extraction, transformation, and loading)
- Proven **hands-on experience in data engineering and pipeline development**
- Hands-on experience with AWS and/or GCP cloud platforms
- Expertise in Informatica (IDMC/IICS, PowerCenter) ETL
- Proficiency in Python, SQL, and PL/SQL
- Experience with databases such as Oracle and Greenplum
- Familiarity with version control tools like GitHub
- Infrastructure as Code experience using Terraform
- Strong understanding of data security and compliance, especially in healthcare environments

Preferred Qualifications:

- Minimum **8+ years** of relevant experience in data engineering / data consulting
- Experience working with healthcare or patient data systems
- Knowledge of data privacy regulations and secure data-sharing practices
- Experience replacing legacy flat file integrations with modern data-sharing solutions
- Strong problem-solving and stakeholder management skills

If you are passionate about leveraging technology to drive business innovation, possess excellent problem-solving skills, and thrive in a dynamic environment, we encourage you to apply for this exciting opportunity.

Join us in shaping the future of data analytics & making a meaningful impact in the industry.

Why Should You Apply?

Grow with Us: Be part of a hyper-growth startup with ample number of opportunities to Learn & Innovate

People: Join hands with the talented, warm, collaborative team and highly accomplished leadership.

Buoyant Culture: Embark on an exciting journey with a team that innovates solutions everyday, tackles challenges head-on and crafts a vibrant work environment
